United States Naval War College Nonresident Graduate Degree Pilot Program

PROGRAM GUIDE 2000-2001

College of Continuing Education U.S. Naval War College Newport, Rhode Island 15 November 2000

INTRODUCTION

In March 1998, RADM James R. Stark, USN, President, Naval War College, authorized a committee to study the feasibility of various options whereby the College could award a masters degree to nonresident students who successfully complete a requisite graduate program, including electives. At a meeting of the Academic Policy Council (APC) in July 1999, the current President of the College, VADM Arthur K. Cebrowski, USN, approved in principle the concept of a Nonresident Graduate Degree Program. The College of Continuing Education was directed, after consultation with the resident academic departments, to draft a specific proposal for the APC, taking into consideration various issues such as selection of students, admissions standards, electives, accreditation, and residency requirements.

The attached <u>Program Guide</u> is the result of more than twelve months of intensive self-study and review of critical issues. In summary, this document sets forth a methodology for a Naval War College Nonresident Graduate Degree Pilot Program which includes exacting standards and requirements. Provision is made for close oversight by the Dean of Academics and frequent interface between the Electives Coordinator and Nonresident Graduate Degree Program Coordinator to foster a high quality, comprehensive course of instruction. Among the key concepts addressed are the following:

- Admissions procedures and standards
- Selection of students
- Electives courses

U. S. Naval War College

- Approval of transfer credits
- Residency requirements
- Fulfilling degree requirements.

Implementation of this Program Guide is effective 15 November 2000.

Approved By:			
CAPT John E. Jackson, USN (Ret.)			
Associate Dean for Distance Education			

POLICY STATEMENT CONCERNING NONRESIDENT SEMINAR GRADUATE DEGREE PILOT PROGRAM

The proposal to conduct a Nonresident Seminar Graduate Degree Pilot Program has been reviewed and approved by both the Provost and the President of the Naval War College. An intense assessment of the Nonresident Seminar Core Courses is being conducted during Academic Year 2000-2001 by the resident faculty. Additionally, the College of Continuing Education is assessing administrative functions of the Nonresident Graduate Degree Pilot Program, including the application process. Progress reports on these assessments will be provided to the College's Academic Policy Council and to the New England Association of Schools and Colleges (NEASC), our regional accrediting body, in the spring of 2001.

A decision on whether or not to award a master's degree to participants in the Nonresident Seminar Graduate Degree Pilot Program will be made pending a report from NEASC on accreditation. All Nonresident Students will be advised promptly when this or other relevant decisions are made. In the interim, guidelines concerning participation in the Pilot Program are as follows:

- All Nonresident Seminar Students are participating in taking courses using the revised curriculum intended for consideration as the master's degree level program.
- Initially, only those students within the nine Washington area seminars designated as pilot program seminars may apply for formal admission to the program. Admissions screening and decisions will be conducted on a rolling basis.
- Students selected for the Nonresident Seminar Graduate Degree Pilot Program will have priority to complete NWC degree requirements *when and if* the Academic Policy Council approves the program for award of a master's degree and accreditation is indicated by NEASC.
- Students selected for the program will be asked to submit potential electives for approval as part of their formal Graduate Degree Plan. Should these students elect to take these electives for credit, these courses will count towards the master's degree if the pilot program gains approval as indicated above.
- All Nonresident Seminar Students, no matter where enrolled, will be encouraged to submit courses for consideration as potential electives.

APPENDICES FOR PROGRAM ADMINISTRATION

The following appendices contain appropriate forms for administration and monitoring of the procedures to be used in the Nonresident Graduate Degree Program.

APPENDIX A – Admission Application	A-1
APPENDIX B – Recommendation Form	B-1
APPENDIX C – Degree Plan	C-1
APPENDIX D – Transfer of Credits Request Form	D-1

SPECIAL NOTE

This document is intended to serve as general guidance to be followed during the Pilot Program only. It is not legally binding on the College, and nothing contained herein should be construed as a promise, guarantee, or commitment to award a Masters Degree.

The College's position regarding "grand-fathering" of core courses has yet to be established. Additional academic work may be required in any of the three corecourse areas completed prior to September 2000 to meet proposed nonresident graduate degree standards.

MISSION

Naval War College

The mission of the Naval War College is to enhance the professional capabilities of its students to make sound decisions in command, staff, and management positions in naval, joint and combined environments; to provide them with a sound understanding of military strategy and operational art; and to instill in them joint attitudes and perspectives. The Naval War College shall serve as a center for research and gaming leading to the development of advanced strategic, warfighting, and campaign concepts for the future employment of maritime, joint, and combined forces.

College of Continuing Education

The mission of the College of Continuing Education is to develop and administer an extension of the educational program of the College of Naval Command and Staff to nonresident military officers and selected government employees.

We are committed to:

- Providing an opportunity for students to obtain a Naval War College diploma by completion of Nonresident Seminars, Correspondence Courses, or Distance Learning (DL) Seminars by Internet closely paralleling the resident program
- Providing an opportunity for selected nonresident seminar students to obtain a Master of Arts in National Security and Strategic Studies from the Naval War College
- Supporting the CNO's Vision for Navy Officer Education that will afford Naval Officers the opportunity to attain appropriate Professional Military Education and a graduate degree
- Providing nonresident students with a faculty of the highest caliber
- Supporting the educational needs of all of our nonresident students
- Meeting the objectives of the Military Education Policy Document
- Achieving a quality nonresident program through continuous improvement.

Program for Joint Education (PJE) Certification

Joint Professional Military Education (JPME) is that portion of Professional Military Education concentrating on the instruction of joint matters in order to develop officers skilled in attaining unity of effort across joint services, governmental and non-governmental agencies, and multinational lines. The Goldwater-Nichols Act, which became law in 1986, requires the completion of a joint duty assignment for promotion to 0-7. The Program for Joint Education (PJE) is that portion of JPME that qualifies officers for Joint Specialty Officer (JSO) qualification.

Educational requirements for JSO qualification can be met through the completion of either an accredited resident or nonresident PJE Phase I curriculum followed by the applicable Joint Forces Staff College PJE Phase II curriculum or through one of the National Defense University Senior-Level PJE curricula. The Naval War College nonresident programs have been accredited as intermediate level PJE Phase I programs.

The Chairman, Joint Chiefs of Staff, has certified both the Naval War College Nonresident Seminar Program and the College of Continuing Education Command and Staff Correspondence Course for PJE Phase I credit. In addition, Phase I certification awarded to the NWC Nonresident Program graduate meets a prerequisite for acceptance into a Phase II PJE course such as the program of study currently offered at the Joint Forces Staff College (formerly the Armed Forces Staff College) in Norfolk.

HISTORY

The U.S. Naval War College

On October 6, 1884, the Secretary of the Navy, William E. Chandler, founded the Naval War College by a General Order that said simply, "A college is hereby established for an advanced course of professional study for naval officers to be known as the Naval War College." Rear Admiral Stephen B. Luce became the first President of what is now the oldest continuing institution of its kind in the world.

Luce's concepts of the nature and needs of the naval profession shaped the War College from its inception. He appreciated the interrelationship of naval power, technology, and international politics, and the necessity for senior officers to understand such complex issues. Admiral Luce organized the War College as "a place of original research on all questions relating to war and the statesmanship connected with war, or the prevention of war."

Captain Alfred Thayer Mahan, the second president of the college, originally had been selected by Luce to initiate a course in naval history. Of all the men who were to influence the institution in its early years, no other was to have such a profound impact. He built a curriculum on the foundation laid by Luce. His lectures on naval history became its central feature, describing the geopolitical factors upon which maritime power was based, the role of a fleet of capital ships in expanding that power, and the relationship between seapower in all its forms and national greatness. These lectures were published in 1890 as *The Influence of Seapower Upon History*, 1660-1783.

On April 1, 1914, the Department of Correspondence Courses was established in a general order signed by Josephus Daniels, Secretary of the Navy. Under the direction of the President of the War College, Rear Admiral Austin M. Knight, the Correspondence Courses Department was organized by Lieutenant William S. Pye, USN, who later became a Vice Admiral and President of the college during World War II. Lieutenant Pye had experimented with War College study by correspondence while at the Naval Academy some years earlier. There were two versions of the curriculum: Course A for groups and Course B for individuals. The initial course offered, "Strategy and Tactics," later evolved into three courses entitled "Strategic Planning," Military Planning," and "Naval Operations." In 1919, drawing on his experiences in World War I, Vice Admiral William S. Sims, then President of the college, organized the Naval War College into four separate departments: Command, Strategy, Tactics, and Correspondence. In those five years, 828 officers enrolled in correspondence courses, and 30 achieved complete requirements for a diploma.

In 1924, a correspondence course in "International Law" was added to the curriculum. After World War II, the War College continued its emphasis on strategic and tactical education with the stated mission of "developing the professional competence of officers in operational planning and the exercise of operational command." This mission had been confirmed by the results of World War II and the testimony of graduates like Fleet Admiral Chester W. Nimitz. "Logistics," later called "Command Logistics," was

introduced in 1949 as an extension of a resident course. By 1950 the new environments and responsibilities facing the naval profession; overseas presence, joint and combined operations, and augmented role in policy formulation, prompted a reevaluation of War College curriculum. All courses, resident and correspondence, were modernized under the presidency of Vice Admiral Raymond A. Spruance, who, in 1932-33, had been Head of the Correspondence Course Department. This series of innovations moved the program closer to the educational concepts of Luce and Mahan. In 1957, "International Relations" was added to the curriculum as a correspondence course for the first time.

In the 1960s, the College developed a more workable solution to the problem of combining operational and theoretical education. Two separate programs were created. The College of Naval Command and Staff was designed for the middle-grade officers, emphasizing the operational and tactical elements of command; and the College of Naval Warfare, for senior officers, stressing broader policy, administrative and strategic questions. Correspondence courses were offered at the Naval Command and Staff level. "National and International Security Organization" saw its beginning as a correspondence course in 1961, and "Counterinsurgency" was offered starting in November of 1962. "Military Management" was first offered in August of 1967.

Major revisions to the Naval War College curriculum and reorganization of the faculty under Vice Admiral Stansfield Turner, president of the college from 1972-1974, opened a new era in the history of the institution. The War College of the 1970s reflected the ideals of Luce and Mahan regarding professional military education to an even greater degree than before. The mission of the college was expanded to develop "the professional capabilities of its students to make sound decisions in both command and management positions." New courses in "Strategy and Policy", "Defense Economics and Decision-Making", and "Naval Tactics" were introduced as the focus of an intellectual effort using a faculty-led seminar technique.

In 1974, Admiral Turner, recognizing that, due to operational and fiscal constraints, many officers and senior DOD civilians would never have the opportunity to obtain a Naval War College education in Newport, directed the Center for Continuing Education to institute "off-campus," faculty-led seminars in Washington, DC. In that fall thirty-three nonresident students matriculated in "Strategy and Policy." Belief in the utility of the nonresident concept has grown to such an extent that today over 1000 students are enrolled in more than sixty nonresident seminars in twenty-one locations stretching from Pearl Harbor to Naples, Italy, while another 650 students participate in correspondence courses. In 1986, the name of the Center for Continuing Education was changed to the College of Continuing Education, reflecting the size and quality of the nonresident graduate education programs offered. Most recently, in conjunction with redefining the current mission of the college, the Naval Studies Board headed by Mr. Robert Murray on behalf of the CNO Executive Panel, recommended further expansion of the College of Continuing Education (CCE) as well as development of new distributed learning concepts and technology.

The present course offerings of the Nonresident Seminar Program: "Strategy and Policy," "National Security Decision Making," and "Joint Maritime Operations," reflect

the basic Turner model. Nonresident Seminar courses taught at all locations closely mirror what is taught in residence at Newport, and all seminars are led by an exceptionally qualified and experienced adjunct faculty. The majority of adjunct faculty members have taught in or are graduates of the resident program at the Naval War College. Many have served on the faculty for more than a decade, as well as on the faculties of other universities around the country. The present faculty of the College of Continuing Education have earned their doctorates at twenty-five different institutions, many of them from the very best in the world including California (Berkeley), Chicago, Claremont, Columbia, Cornell, Fletcher School, Florida State, Georgetown, North Carolina, Ohio State, Oxford, Princeton, Rice, Southern California, Stanford, Vanderbilt, Virginia, Washington, and Yale.

The Chief of Naval Operations, Admiral J. L. Johnson, USN, issued his "Vision Statement for Navy Education" in April 1999, stating that "revitalization of the Navy's investment in officer education is an essential ingredient for success in meeting the challenges of the 21st Century." Admiral Johnson stressed that he viewed education as "crucially important" and called upon the Navy's senior leadership to make education a priority in the development of the officer corps. "My vision is simple," he said, "each career officer will be afforded the opportunity to attain both a relevant graduate degree and appropriate Professional Military Education."

Establishment of the Naval War College Nonresident Graduate Degree Pilot Program creates a unique opportunity for officers and senior federal employees to attain Professional Military Education and a Master of Arts in National Security and Strategic Studies simultaneously in support of the CNO's vision. Many of these individuals otherwise would not have the opportunity for intermediate level service college study. Consequently, the Nonresident Graduate Degree Pilot Program not only offers a strong incentive for participants, but also substantively enhances the academic reputation of the Naval War College throughout the fleet.

NONRESIDENT GRADUATE DEGREE PILOT PROGRAM

The Nonresident Graduate Degree Pilot Program offers an opportunity for current College of Continuing Education students to apply for admission to a graduate degree program which, pending approval by the Colleges Academic Policy Council and accreditation by the New England Association of Schools and Colleges, may lead to the award of a Master of Arts in National Security and Strategic Studies from the Naval War College. Those selected for the pilot program will engage in a rigorous academic experience that includes the traditional core NWC courses, electives, and a capstone war game residency requirement designed to closely align with the resident experience in Newport.

Admissions Requirements

To be admitted to the Nonresident Graduate Degree Pilot Program, potential graduate students must:

- Possess a baccalaureate degree from a regionally accredited institution.
- Be enrolled in one of the following Naval War College Nonresident Seminar Courses in the Washington, DC area: "Strategy and Policy," "National Security Decision Making," "Joint Maritime Operations." A grade of B- or better is required in all Naval War College courses. (Enrollment in a correspondence course or two-week reserve officer course during Annual Training (AT) does not meet this requirement.)
- Be an active duty or reserve officer with the grade of 0-3 or higher serving in the United States Navy, Marine Corps, Coast Guard, or 0-4 or higher serving in the Army, Air Force, National Guard, USPHS, NOAA, or be a Federal employee, grade GS-11 or above (or equivalent).
- Submit two letters of recommendation, at least one of which must be from a Naval War College faculty member familiar with the academic ability of the applicant. The other may be a commanding officer or senior supervisor of the applicant. Recommendation forms will be included with application packages and should be submitted directly to the Naval War College by the individual completing the recommendation.

Appendix A is the Admission Application Form. Appendix B is the form for Letters of Recommendation. Copies of these forms will be available from the Nonresident Graduate Degree Program Coordinator and on the College's web site. Application Procedures are described in the following section.

Application Procedures

Application forms for admission to the Nonresident Graduate Degree Pilot Program (Appendix A) and letters of recommendation (Appendix B) may be obtained from the Naval War College Nonresident Graduate Degree Program Coordinator or on the college's web site. Applicants must request official transcripts be sent directly from each institution where undergraduate or graduate work was previously completed to the Naval War College Nonresident Graduate Degree Program Coordinator.

Selection to participate in a Naval War College Nonresident Seminar does not guarantee admission to the Nonresident Graduate Degree Pilot Program. Students enrolled in one of the nine designated Washington area pilot program seminars may apply for admission to the Nonresident Graduate Degree Pilot Program. Note that a brief statement of purpose and two letters of recommendation are required. These letters must be sent directly from the recommender to the Nonresident Graduate Degree Program Coordinator.

Upon review of a completed application package a final admission decision will be rendered by the Associate Dean for Distance Education, based upon the recommendation from the Admissions Committee of the Nonresident Graduate Degree Program. The committee will be chaired by the Nonresident Graduate Degree Program Coordinator and composed of at least two other faculty members. Admission will be on a rolling basis.

The Nonresident Graduate Degree Program Coordinator will notify applicants as to the decision. The Nonresident Graduate Degree Program Coordinator will develop a Graduate Degree Plan (Appendix C) with all successful applicants and serve as their graduate program advisor throughout their tenure in the program. The Graduate Degree Plan will include all requirements that must be met in order to attain the Master of Arts in National Security and Strategic Studies as well as an intended graduation date.

CORE ACADEMIC PROGRAM

Introduction: Nonresident Seminar Program Core Courses

The Naval War College enrolls military officers and government employees in a Nonresident Seminar Program in which the curriculum is closely aligned with the resident program of instruction in Newport and leads to Phase I PJE Certification. (See page 7.) Pending approval by the Academic Policy Council and accreditation by the New England Association of Schools and Colleges, a Master of Arts in National Security and Strategic Studies from the College of Naval Command and Staff may be awarded after satisfactory completion of the Nonresident Graduate Degree Pilot Program as administered by the Nonresident Graduate Degree Program Coordinator. The core courses for the degree program must be taken through the Nonresident Seminar Program offered at one of the locations below and not by correspondence.

The core courses of the Nonresident Seminar Program are offered on an academic year basis, commencing in August and ending in April. Applicants for admission to the Nonresident Seminar Program must apply by 15 July. The Nonresident Seminar Program core courses are currently offered in the following areas:

Bangor, WA	Newport, RI
Mechanicsburg, PA	Norfolk, VA
Millington, TN	Patuxent River, MD
Monterey, CA	Pearl Harbor, HI
Naples, Italy	Pensacola, FL
New Orleans, LA	San Diego, CA
Washington, DC	Guantanamo Bay, Cuba
	Mechanicsburg, PA Millington, TN Monterey, CA Naples, Italy New Orleans, LA

Graduate students are enrolled for one academic year in a seminar core course consisting of 15-20 students. Seminars meet one evening per week for about 3 hours, under the direction of a Naval War College faculty member, normally from the last week in August through end of April. These seminars include formal presentations and lectures by resident faculty members from Newport and by visiting professors from colleges and universities around the country. The seminars are conducted at the graduate level and require appropriate initiative, research, writing, and oral commentary on the part of each student.

The College recognizes that duty requirements occasionally may necessitate late submission of required work. Students must coordinate and arrange for such delays with the faculty member in advance. Students are advised that all delinquencies must be resolved prior to 30 April of each academic year in order to qualify for graduation. Students unable to meet that deadline must request an extension in advance, from the Director of the College of Continuing Education in Newport. All work completed after 30 April must be submitted to the Director for processing in Newport. Except under the most unusual extenuating circumstances, no extension will be granted beyond 1 August.

No student with an "Incomplete" grade will be enrolled in another seminar course or admitted to the Nonresident Graduate Degree Program until the "Incomplete" is resolved.

Course Descriptions

The Naval War College bases its resident programs on three core courses: 1) Strategy and Policy, 2) National Security Decision Making, and 3) Joint Maritime Operations. The College of Continuing Education offers tailored versions of these courses at selected locations. Students may complete the core courses at any of the seminar locations and in any sequence, but the recommended progression is in the order given above.

Strategy and Policy (S&P)

This course is founded on the Clausewitzian premise that "war is a continuation of policy with the addition of other means." Strategy is the bridge that connects the state's goal with the operation of its military forces. Students are familiarized with the fundamentals of foreign policy and military (joint and combined) strategy. In addition, the course assists students in developing a coherent framework for analysis of decisions involving the use of force to achieve national objectives.

The course is presented through a series of historical case studies examining specific examples of strategic-political interaction. The course, however, is definitely not intended to be a study of history for its own sake. The case study topics have been carefully chosen to focus on historical situations that illustrate the enduring and recurring concerns of the strategist. The principal concerns interwoven throughout the course are:

- the political determinations and objectives of war
- the alternatives to war as an instrument of policy
- the international environment, institutions, and alliance structures through which policy and strategy interact
- the comparative merits of joint and combined warfare strategies
- civil-military relations in peace and war examined with reference to political and strategic problems and options

National Security Decision Making (NSDM)

This course educates students in the effective selection and leadership of armed forces within national resource constraints. The course provides instruction in: strategic planning and selection of future military forces; systematic approaches to programmatic resource choices under conditions of high uncertainty; and the nature of economic,

political, organizational and behavioral factors affecting selection and command of military forces. Areas selected for special attention:

- the changing economic, political and military environments affecting national security
- major joint military force planning, concepts, issues and choices
- the structure and process for planning and programming joint military forces and the interface of that process with the federal budgeting process
- a conceptual understanding of the types of analysis underlying many DOD resource allocation decisions
- political, organizational, and behavioral influences on national security decision making and implementation
- strategic leadership and management of large, complex national security organizations

Joint Maritime Operations (JMO)

The course is an executive development course that emphasizes planning and decision making factors at the joint task force level for operations in the maritime environment. Operational problems require military officers to make increasing use of many disciplines. This differs from the operational planning in past, when application of a single discrete discipline was more the norm. Officers must have a firm grasp of military strategy, an understanding of joint and combined operations, and a thorough background in the essential elements of the military planning and decision making process in order to deploy, employ, and sustain military forces successfully and efficiently. Consequently, the Joint Maritime Operations course employs a multidisciplinary approach, providing students the opportunity to synthesize various ideas that include maritime strategy, joint and service doctrine, military decision making, operational planning, naval warfare, military warfare, threat assessment, and war-gaming techniques. Joint Maritime Operations applies these ideas to military problems requiring decisions in dynamic situations. The integrated themes of the course are joint maritime operations and military decision making. Reference is made throughout the course to the ability of the CINC and the staff planners to be able to answer confidently four fundamental questions:

- What military conditions must be produced in the operational arena to achieve the strategic goal? (ends)
- What sequence of actions is most likely to produce that condition? (ways)
- How should the resources of the joint force be applied to accomplish the desired sequence of actions? (means)

- What is the likely cost or risk to the joint force in performing that sequence of actions?

The ability to answer these questions is the very essence of the Joint Maritime Operations course.

NONRESIDENT GRADUATE DEGREE PROGRAM REQUIREMENTS

Nonresident Graduate Degree Pilot Program requirements may be divided into the following three categories:

•	Nonresident Seminar Core Courses	20 Semester Hours
•	Elective Coursework	9 Semester Hours
•	Residential Capstone Experience (Pass/Fail)	1 Semester Hour

Nonresident Seminar Course Work

At the heart of the Nonresident Graduate Degree Pilot Program are the three core Nonresident Seminar courses of the Naval War College:

•	Joint Maritime Operations (JMO)	6 Hours
•	National Security Decision Making (NSDM)	7 Hours
•	Strategy and Policy (S&P)	7 Hours

These courses are described elsewhere in this <u>Program Guide</u>. A grade of B- or above must be earned in each core course in order to be eligible for the degree.

Electives

Satisfactory completion of nine graduate semester hours of elective courses is required. These courses must be approved in advance by the Nonresident Graduate Degree Program Coordinator and the Naval War College Electives Coordinator. Upon admission to the program all students will develop a Graduate Degree Plan (Appendix C) in conjunction with the Nonresident Graduate Degree Program Coordinator, including their proposed electives. In general, electives will be pursued through courses which in broad terms are relevant to or represent advanced study in each of the three core course disciplines.

Students may pursue electives simultaneously with seminar core courses. It is the responsibility of each student taking elective courses at other institutions to comply with their procedures concerning admissions, registration, and fee payment. An official transcript or completion documentation is required for any coursework pursued at other institutions.

The elective requirement may be fulfilled by any of the following methods:

• Appropriate graduate courses pursued at a regionally accredited university.

A maximum of nine semester hours taken at other universities with a grade of Bor better will be approved on a case by case basis for transfer towards the Nonresident Graduate Degree Pilot Program provided they have not previously been applied towards another degree.

The following colleges and universities have expressed interest in allowing Naval War College students to pursue graduate courses on their campuses: San Diego, San Diego State, Hawaii Pacific, Washington, Old Dominion, West Florida, Memphis, Norwich, New Orleans, Mary Washington, Harvard, and Boston University's Institute for World Politics in Washington, DC. A list of pre-approved courses and institutions will be developed over time and made available to all interested students.

• Partnerships with other Navy and DOD institutions of higher learning.

Although slightly different in nature, the Naval War College currently has educational partnerships with two government educational institutions, the Naval Postgraduate School (NPS) and the Uniformed Services University of the Health Sciences (USUHS). NPS students in Monterey are taking and receiving academic credit for Naval War College courses. In early 2000, USUHS developed a new graduate course entitled "The Emerging Threat of Biological Weapons and Bioterrorism: An International Scientific and Diplomatic Challenge" which is open to students of the Naval War College as well as their own Ph.D. candidates in various departments. Five Naval War College students were selected to participate in this pilot model program. USUHS plans to offer additional courses of a similar nature in the coming academic year. They have indicated willingness to continue admission of a limited number of Naval War College students. The Bioterrorism course has been exceptionally well received by the participants this spring.

Other expressions of interest have been received concerning similar relationships. For example, the Director of Naval History has suggested that his staff might be able to offer a graduate elective course in Naval History. National Security Agency's Training Division indicated a willingness to open some of their courses on the impact of cryptology in warfare to NWC students. Finally, the Division of Institutional Research at Marine Corps University expressed interest in sharing some of their courses. In each instance these courses would be available to any Naval War College student, resident or nonresident, at no cost. Prior approval by both the Nonresident Graduate Degree Program Coordinator and the Electives Coordinator would be required.

• Residential electives at Naval War College in Newport.

A limited number of nonresident students in Newport may register to take electives in residence on a space available basis. Future advances in Distance Learning technology should also make possible the delivery of residential electives to a wider geographic audience depending on available resources and faculty interest in web-based teaching.

Electives from other regionally accredited institutions will be approved when they meet the Naval War College's standards for quality, academic rigor, and congruence with the overall focus of the Naval War College program. This judgment will, to a degree, be subjective in nature.

Residency Requirement

As the title of the program suggests, the purpose of the Nonresident Graduate Degree Program is to expand upon the educational opportunity provided by the Naval War College to qualified military officers and federal employees by minimizing the residency requirement at Newport, Rhode Island. However, because the Naval War College offers a tradition and invaluable experience that is unattainable elsewhere, one hour of graduate credit earned in residence at the Naval War College in Newport through participation in a Capstone Experience War Game is necessary in order to satisfy requirements of the Nonresident Graduate Degree Pilot Program.

The Naval War College has a long and proud history of war gaming which now incorporates some of the most sophisticated systems in the world. A wide variety of games and planning exercises are conducted at the college, many of them interactive with or closely connected to the fleet. Active participation in a major planning exercise, war game, or a minimum of a week of work-up and preparation for the exercise satisfies this requirement. One hour of academic credit will be awarded on a pass/fail basis. The Nonresident Graduate Degree Program Coordinator and Joint Maritime Operations Division Head will coordinate completion of this requirement.

The intent of this requirement is to bring resident and nonresident students together to share in a capstone educational experience through a JMO War Game. Current planning calls for the first such war game to be conducted in May of 2001. Additional details will be promulgated as they become available.

Overall Degree Requirements

Completion of all core and approved elective course work with a grade of B-(pass in the case of courses taught pass/fail) or better is required. All electives and other course work being applied towards this degree must be earned within seven years of initial enrollment in a core seminar course.

Transfer of Credits

A student must request in writing and receive formal approval for any coursework completed at other institutions within the previous seven years to be applied to the Naval War College Nonresident Graduate Degree Program. Official grade reports or transcripts must be forwarded to the Nonresident Graduate Degree Program Coordinator. In order to receive credit for any courses from other institutions the grade must be B- or above.

ADMINISTRATIVE MATTERS

Tuition Assistance

Students may wish to check with their Navy College Office or other education center to determine eligibility for tuition assistance and any possible arrangements regarding elective course offerings. Tuition assistance for 75% of the tuition of courses may be approved as long as they apply towards a degree as listed on the degree plan.

Graduation

Graduation is conducted in June each year at the Naval War College in Newport, Rhode Island. Documentation of program completion must be received in the Nonresident Graduate Degree Program office no later than 30 April in order to participate in that year's ceremony. The Naval War College registrar must be notified of completion of the graduate degree plan in order for the student to be awarded the Master of Arts in National Security and Strategic Studies from the College of Naval Command and Staff. The graduating student may choose to attend the ceremony in Newport or have the degree diploma mailed. Students may qualify for a Naval War College diploma and PJE Phase 1 credit prior to or simultaneously with completing requirements for the master's degree.

Student Records

The Nonresident Graduate Degree Program Coordinator, in conjunction with the Deputy Registrar, will maintain student files. At a minimum, these files shall include the student's admission application, transcripts, degree plan, and other relevant correspondence such as recommendations and elective approval letters. The Nonresident Graduate Degree Program Coordinator and the Deputy Registrar will certify completion of all degree requirements to the Naval War College Registrar. Upon certification, the file will be forwarded to the Naval War College Registrar in Newport for awarding of the Master of Arts in National Security and Strategic Studies and permanent retention in the official records of the college.

Naval War College Nonresident Graduate Degree Pilot Program 827 Sicard St. SE Washington, DC 20374-5039

APPLICATION FOR GRADUATE DEGREE PILOT PROGRAM ADMISSION

Privacy Act Statement:

Authority to request this information is derived from 5 United States Code, section 301, Departmental Records, and 44 United States Code, section 3101, Records Management. The purpose of this form is to enable individuals to provide the necessary information to the U.S. Naval War College for admissions consideration, enrollment, and administrative processing associated therewith.

The information you provide will become a permanent part of your Naval War College record. If admitted, the information provided will be used to enroll you in this program and to report your successful completion to higher authority.

Completion of this form is entirely voluntary. Failure to provide your social security number may prevent your enrollment. Failure to provide other information will hinder the College in providing service to you.

<u>Instructions</u>: The following information is required in order to make a decision on admission to the program. Completed applications, two completed recommendation forms, and one copy of your official transcript from each institution previously attended must be submitted to: Naval War College Nonresident Graduate Degree Program Coordinator, 827 Sicard St. SE, Washington, DC 20374-5039.

1.
